

WORLD'S BIGGEST BURGER

A US Restaurant already famous for creating massive burgers has just added what appears to be the World's Biggest Burger to their menu. Weighing in at a massive 123 lbs the '123' Burger is set to break the current 105lb world record.

Denny's Beer Barrel Pub in Clearfield, Pennsylvania will be submitting paperwork to the Guinness Book of World Records. The massive meaty burger includes a whopping 80lbs of beef along with at least a pound each of mayonnaise, ketchup, mustard, relish, and sliced lettuce. Let's not forgot the 160 slices of cheese, half a dozen onions, and dozen chopped tomatoes.

The burger bun itself weighs 30lbs. A generous garnish of chilli peppers and pickles brings the monster up to its 123lb target weight. The burger will take pride of place on the menu priced at \$379.00.

It's not the first time Denny's Beer Barrel has been in the news for its extravagant burgers. The restaurant previously announced its Beer Barrel Belly Buster – but this was a comparative lightweight at just 15lbs.
