

Software Rental for Small Businesses.

A Maidenhead firm has developed a revolutionary new way for small businesses to 'rent' award winning business tools at low-cost.

Maidenhead-based firm The Business Software Centre (TBSC) is slashing the cost of owning high quality business software and revolutionising the way small businesses deploy these tools. Today (21st August) sees the launch of 'rentable' business software available exclusively from www.rentsoft.co.uk.

"We urge local businesses to try out our 30 day commitment-free trial at www.rentsoft.co.uk – they have nothing to lose. What they will be doing is helping to pioneer a revolutionary technology that's for once, on the side of small businesses," Phil Hames, TBSC Managing Director explains.

"There are major benefits to renting software. It really is a no-brainer. Anyone owning a small business will tell you that buying software

off-the-shelf is too expensive. Up-front costs and regular upgrades and technical support take their toll on small businesses' limited budgets. "We don't believe that small businesses should be penalised for wanting to use the high quality business enabling support tools, which is why we have developed the suite."

Key benefits:

- Rentable full version software worth over £500, from £16 per month (ex. VAT)
- Software for: Business planning, Financial forecasting, Creating promotional materials including brochures, letters and price lists, Maintaining accurate staff records, Complying with Health & Safety legislation, Creating legal employment documents
- 30 day commitment-free trial.
- 100% Tax deductible
- Upgrades and support included
- All software and services available for use offline
- Virus and security risks are minimised and performance is optimised

TBSC is a provider of award-winning software for small businesses and its products, including Ultimate Business Planner, are available via the biggest high street and online retailers in the UK. Now, it releases its brand new rentable 'Business Software Suite' via www.rentsoft.co.uk and is promoting the benefits of renting software to small businesses across the country.

Based in Maidenhead, Berkshire, and established in February 2004, The Business Software Centre (TBSC) was created to exploit a vision to make the benefits of business process automation technology available to SMEs. With exclusive rights for the distribution of Atlas Business Solutions Inc (ABS) and Vipamedia products within Europe, TBSC has been selling small business software titles as downloadable or packaged products through the TBSC website and trusted channel partners such as Amazon, PC World and Inmac.
