

COMMERCIAL DEEP CLEANING

With years of experience behind them, Surefoot deal with the deep cleaning of kitchens, toilets, shower rooms and other commercial and industrial areas.

We have a uniquely gentle yet firm approach.

We don't use harsh chemicals, nor do we scrub and scrape at grime and grease. Instead, we use products which emulsify dirt and oil, making it easier for us to lift dirt completely out of the surfaces of floors, walls, tiles and grouting. We take pride in leaving kitchens and other commercial areas sparkling, secure in the knowledge that a properly deep-cleaned surface is a safer surface.

Our cleaning methods restore the slip-resistant qualities of floors and tiles, making your workplace safer for employees and visitors. After any cleaning job, we will issue a certificates of cleaning which is recognised by Environmental Health Officers and insurance companies.

We won't quote one price for an entire deep clean. Instead, we'll break down our quote into the individual components (floors, ceilings, walls, extractor hoods and canopies, equipment, filters and fans, sinks and benches) so that you can cherry-pick and prioritise to suit your budget.
