

Confidential shredding for local businesses

Green-a-way offer bespoke waste management solutions to businesses in Berkshire, Oxfordshire and Middlesex.

Our speciality lies in confidential shredding.

Did you know that, as an employer, you have legal obligations when it comes to securely disposing of any confidential paperwork? This can even include envelopes with job-title and address details.

Almost every firm has paperwork containing confidential information in the office. It's crucial that you safely and securely dispose of any information you wouldn't want people to get hold of. Our shredding solutions put your mind at rest: with our new mobile shredding trucks and balers, we can now offer both an off-site and on-site service.

Facilities Managers, Office Managers, Marketing, Finance, Payroll and HR departments should all consider how

they dispose of sensitive and confidential paperwork once it becomes waste. Green-a-way's Directors will arrange a site visit where we will discuss your needs and assess what makes your situation unique.

We will then suggest a waste disposal and confidential shredding solution to you which might include document destruction, mobile shredding or an off-site service with collection. Whether it's regular shredding you need or a one-off solution for office moves or refurbishments, we can help.

We don't tie you into a contract or a scheduled service (unless you want to be) and we can also safely dispose of cardboard, computer hardware and office goods. You'll always receive a Certificate of Destruction so you can rest assured you're meeting your obligations.

We offer a complete and comprehensive waste management service and pride ourselves on being confidential shredding experts.
