

# How we work

Small, focused and specialised, we are your local recycling and waste management company.

One of our Directors will visit your site to discuss your needs and carry out a quick but in-depth site survey to see how your situation is different from anyone else's.

Once we've identified your requirements, we'll suggest a bespoke solution and create a recycling programme for you which could incorporate:

- secure document shredding (on- or off-site)
- paper recycling
- office equipment recycling
- waste management
- document scanning

We can offer recycling and waste management services during office moves, refurbishments and clear-outs or on a regular basis.

We work with a trusted office cleaning firm to offer you a one-stop-shop solution which is totally flexible.
