

Office managers

what's your waste management strategy?

Offices generate a lot of waste: paper, cardboard, confidential documents, computers, hard-drives, plastic and cans...

It's more waste than we generate at home, but often we think less about waste management in the work-place than we do on the domestic front.

You can change that by implementing and maintaining a waste management strategy for your work-place. You don't need to do it by yourself: why not enlist the help of professionals? Green-a-way are waste management specialists who pledge to help local businesses in Berkshire, Middlesex and Oxfordshire boost their green credentials.

We are your one-stop shop for complete waste management solutions. If your needs include some (or all) of the following, give us a call to see how we can advise.

- Paper recycling
- Cardboard recycling
- Safe disposal and recycling of computers, hard drives, monitors and keyboards
- Plastic, glass and aluminum can waste recycling (co-mingled waste)
- General waste collections

With a wide range of bins to supply you, from office to wheelie, Green-a-way can offer a more flexible, tailor-made solution to your waste management issues. We react to your needs: if it's to do with waste, cleaning or storage, ask us first. We are confident that we can suggest a cost-effective, simple solution. We work on a consultancy basis, recognising that every business's needs are different. Our Directors are happy to meet and discuss your needs before we come up with the best solution for you.

Green-a-way is a services driven waste management company: our Directors are hands-on, we don't impose contracts or scheduled services and we enjoy loyalty from our clients, who are happy to leave their waste management needs to us.
