

Low emissions Mini Coopers

Help the environment as you help your bank balance by leasing one of the greenest cars available: the Mini Cooper.

This super-cool small car will beat the heat at the pumps this summer.

The team at Cooperlease are committed to making it easy for you to lease the greenest small cars and are delighted to offer you two Minis:

The Mini Clubman 1.6 Cooper D (Chili) boasts an impressive 68mpg and outstanding emissions of just 109g/km. Cooperlease has made their Mini Clubman 1.6 Cooper Ds available for a monthly cost of £315 for a rental period of 36 months.

The Mini Cooper 1.6D (Chili) is on offer from Cooperlease for just £325 for a rental period of 36 months. With a fantastic 72mpg, this little car is the perfect choice for you if low emissions and high mpg are your main concerns.

Cooperlease's Ben Newton, says: "Meeting the demands of the current economic climate doesn't have to mean losing out on style. Mini Coopers are the perfect small car to choose: stylish, fun to drive and endlessly economical. They're the perfect choice for anyone who prioritises low emissions when choosing to lease a company car."

If you want to find out more on anything you see here, just get in touch - we'll be pleased to hear from you.
