The speed and efficiency of service from Business in Berkshire was fantastic. My website was designed and online in no time – and indexed by Google straightaway’

‘As a relatively new business we were looking for an inexpensive website solution to help us get established.

Most of the web design companies I spoke to were either too expensive or didn’t seem confident about getting the site picked up by the search engines. Then someone recommended Business in Berkshire and I’m certainly glad I took their advice.

Before long, I had a fully functional, great looking website online - and it’s already flying up the search engines. Particular thanks are due to Jon and his team for making this happen – I couldn’t have achieved such impressive results myself in so short a time. Instead they took responsibility for the task, leaving me time to concentrate on what I do best. We now have the tools we need to generate leads and enquiries to help our business grow.’
