

PROFESSIONAL

ELECTRICAL SERVICES FOR PUBLIC SECTOR BUILDINGS

R&G Electrics UK specialise in electrical inspection, certification and testing to meet BS7671 standards.

We are fully insured to comply with the new building regulations (Part P) which came into force on 1st January 2005.

As well as offering a range of electrical testing and installation work, we can issue electrical safety certificates and landlord's certificates, enabling building owners and operators to comply with the range of health and safety and fire safety legislation which they are legally obliged to meet.

We do not charge for call-outs (unless our emergency service is called) and pride ourselves on offering free estimates with no obligation. Our 24-hour emergency service allows us to respond to emergencies within one hour.

At R&G Electrics UK, we are renowned for our quality of work and excellent customer service. We believe repeat business is a good indicator of how well we are doing, and are therefore pleased that so many of our clients return to us. We like to form meaningful strategic partnerships with suppliers and clients in order to keep our business, and the industry, growing. Our focus is always on offering a full range of top-quality electrical testing, maintenance and installation services with best-practice customer care at the best possible value for money.

Based in London, R&G Electrics UK offer professional electrical maintenance, inspection, testing and installation services for public sector buildings.

To find out how we can help you, contact us on 0800 652 5532.
