

Low emission company cars

Can company cars help in the fight against emissions whilst remaining stylish enough to be a status symbol?

Windsor Vehicle Leasing think they can. Our latest set of offers show that fleet cars and company vehicles can be as green as their smaller counterparts.

Windsor Vehicle Leasing's Ben Newton, says: "Company cars have always needed to look good and perform well, but now they need to be green, too. Our new offers give fleet managers and those choosing company cars a great set of choices for low emission vehicles."

The BMW 118d is on offer from Windsor Vehicle Leasing at just £399+VAT a month for 36 months. With a 2.0 litre, direct-injection turbo diesel four-cylinder engine, it gives out an impressively low 118g/km and cruises at 59mpg. The car's green credentials won it the title of 2008 World Green Car award in New York, suggesting that there's no better choice for a green yet stylish company vehicle.

Also on offer from Windsor Vehicle Leasing is the VW Golf 1.9 Tdi S DPF Bluemotion, one of the vehicles boasting the badge of Volkswagen's Bluemotion sub-brand, developed to lead the market in environmentally-friendly vehicles.

Windsor Vehicle Leasing can source the greenest cars for your company fleet. Our latest offers make it easier than ever to make sure your company car works as hard for the environment as it does for you. Talk to the professional and experienced fleet management team at Windsor Vehicle Leasing to find out how we can help you.
