

Leasing a company car

Whether you're a sole trader or fleet manager for a multi-national, there are benefits to using the professional leasing and fleet management services of a business car leasing company like Windsor Vehicle Leasing.

No matter which make or model of car you want to drive, we can source it for you quickly and easily, leaving you with more time to get on with running your business.

We will tailor a lease package to suit your needs. For more flexibility, our Openlease package allows you all the benefits of executive car leasing without the restrictions of a contract. We can offer you the lease of a car or van for just 28 days at a time to suit your needs, allowing you to enjoy all the benefits of contract hire and leasing without needing to sign a long-term contract.

Windsor Vehicle Leasing's Marketing Director, Ben Newton, says:

"Openlease is the ideal option for companies with an existing insurance policy who want a flexible car leasing arrangement."

We also offer professional fleet management services, including vehicle financing, maintenance and health and safety management. By letting our specialist team take care of your fleet management concerns, you will minimise the risks associated with vehicle investment whilst improving your fleet's efficiency and productivity. We will ensure that your fleet is totally compliant with relevant government legislation, taking care of all your fleet management queries. With the well-documented rise in fuel costs, the demands of congestion charging and changes in tax charges, fleet management can seem problematic and challenging. Talk to the professional and experienced fleet management team at Windsor Vehicle Leasing to find out how we can help you.
