

Leasing the NEW Skoda Fabia

Ever thought about leasing rather than buying your next car? The multi-award winning Skoda Fabia is back with a new look and a host of changes making it one of the finest superminis available.

Leasing a Skoda Fabia is a cost-effective way to get behind the wheel of a brand new car whilst still keeping within your budget. Let's take a closer look at leasing a Skoda Fabia.

'Good things really do come in small packages' screams Skoda's promotional tagline for the new Fabia which launched on May 17th. And looking at the model's smart styling, sparkling performance, and strong reliability it's easy to appreciate the winning virtues of the Fabia – especially when compared to some of its competitors in the popular 'supermini' category.

The new model retains the charm and reliability of the previous Fabia but in all other respects is a completely new car. New curvaceous design, safety improvements, more space, extra engine choices, and luxury interiors are all part of the new Skoda Fabia experience.

Although classed as a small car, the new Skoda Fabia feels big inside, with improved leg and headroom and plenty of space – even the boot has a class-leading 300 litres of space.

Leasing a Skoda Fabia is an affordable way to get behind the wheel of one of the best equipped small cars available today.

There's no shortage of models in the range, with 4 petrol engines and 3 diesels to choose from (5 of these are brand new engines). The petrol version ranges from 1.2 up to 1.6 litres, whilst the diesel versions come with either a 1.4 or high-performance 1.9 which punches out a healthy 105bhp.

Leasing a Skoda Fabia means you can enjoy the ride without breaking the bank. Leasing is a popular choice for those looking for an affordable way to drive a new or nearly new car. With car leasing, the driver's monthly payments cover the cost of the depreciation over the time they use the car, with the option to buy or return the vehicle at the end of the agreement. As leasing payments tend to be cheaper than purchasing, it's a cost-effective option which often means a higher spec model can be yours to drive every day.
