

Short-Term Vehicle Leasing

Until recently companies only had one option for short-term vehicles - renting. However, this is an expensive way of running a fleet, particularly for the ever-changing British workforce (contract workers, project workers, outsourcing etc.)

Windsor Vehicle Leasing (WVL) provides short-term arrangements with financial and administrative flexibility.

Ben Newton of Windsor Vehicle Leasing said: "We have many nearly-new vehicles available for the short-term. The six-monthly lease is beneficial because it helps companies working on a project basis, it avoids the vagaries of the economy and it means companies don't have to be tied into a long lease."

Although shorter leases are more expensive than the standard three-year lease, they provide greater flexibility while satisfying a variety of corporate needs. As an alternative to expensive pool cars which often sit idle in a car park, or an inflexible long-term lease, they have strong commercial value.
